CARDELLA
Managing Your Construction + Demolition Debris

DAMAGE LIABILITY DISCLAIMER AND WAIVER

Customer: _____ **Date:** _____
Service Address: _____

You have provided permission for Cardella Waste Services to deliver, exchange, and/or remove a roll-off container in the driveway or some other area beyond the street or curb line. Be forewarned that Cardella Waste Services is not liable for any damage beyond the curb line.

The truck and the container that is used can weigh anywhere from 40,000 to 80,000 lbs, and when the hoist is extended, can reach a height of approximately 25 feet. Cardella Waste Services cannot guess or verify what impact this weight may have on the driveway and surrounding areas. As such, damage may occur from any number of things, including, but not limited to:

- The combined weight of the loaded container and truck causing cracking, indentations, tire marks, holes, depressions or scratches in the driveway and/or the surrounding areas.
- Damage to low hanging wires or low tree branches.
- Damage to paver walkways, grass, trees, shrubbery, bushes and other landscaping.
- Damage to curbs, sidewalks, aprons, retaining walls, fencing, gates, or posts along the path of travel.
- Damage to the house, garage, deck, siding, gutters, downspouts, air conditioning units, meters, overhangs, or any other structure or its contents when a container is placed close to that structure.
- Damage to septic systems, drywells, drains, sprinkler or irrigation lines, underground utilities, buried oil or propane tanks, or any other subsurface structure not visible from the surface.

Please note, Cardella Waste Services will make every effort to prevent damage by placing wood under the container. However, we cannot guarantee that damage will not occur.

PLACEMENT WITHIN FIVE (5) FEET OF A HOUSE OR OTHER STRUCTURE.
If you request or direct Cardella Waste Services to place a container within approximately five (5) feet of a house, garage, deck, fence, or any other structure, you acknowledge and accept the additional risk that this placement creates, and you agree that Cardella Waste Services is not liable for any resulting damage to that structure or its contents.

Containers are often loaded unevenly, and a container that is heavier on one side can shift, tilt, or swing while it is lifted onto or off of the truck. A container placed close to a structure leaves little or no clearance if that happens. You agree to load the container evenly, not to load above the top rail, and to keep the area around the container clear. Our driver may reposition the container, ask that it be reloaded, or decline to service it if the requested placement cannot be serviced safely.

Cardella Waste Services will not place the container beyond the curb line until this acknowledgment is signed and returned, or until we receive a written (email or text message) response confirming that you accept these terms.

By signing below, you represent that you are the owner of the property or are authorized by the owner to grant this permission, and you hereby release Cardella Waste Services, its respective subsidiaries, employees, affiliates, successors, and assignees as their interests may appear, from any and all claims related to alleged damages caused by the normal container delivery, exchange, and removal operations at your job location.

Should you have any questions, please contact us at orders@cardellawaste.com or 800-548-7001.
